**HOTEL** - <https://tombstone.innhistory.com/>

“Inn History Tombstone is inspired by the Apache Native American tribes who lived here first, the silver prospector that founded the town, and outlaws & lawmen who's gun fight made 1881 headline news. Our old west-themed motel is a nod to the silver miners of Tombstone, Arizona in the 1880s. Back then, folks came to this area in hopes to get rich quick. Now they come to catch a taste of the frontier spirit. We've carefully selected photographs and items to decorate our motel rooms as part of a self-guided tour to dive deeper into the area's culture and history. Learn about the world's longest poker game or the native Apaches who first cared for this land.”
